BUTTON COMPONENT:

The screenshot displays the Visual Studio Code editor with the following details:

- Explorer Panel:** Shows the project structure with folders like `my-app`, `app`, and `Componet`. The file `ButtonComponet.jsx` is selected.
- Editor:** Contains the code for `ButtonComponet.jsx`. The code defines a function component that returns a JSX element with a container, an image, a title, a description, and a link.
- Terminal Panel:** Shows the output of the compilation process, indicating successful compilation for multiple modules.

```
1 import React from 'react';
2
3 export default function ButtonComponet({img,title,description}) {
4   return (
5     <div className='main'>
